

## A little reflection on community

This past month has given us some space for reflection, which we would like to share.

It's easy to use the word 'community' and forget how strong that word is.

But not everywhere has it, and it's something that cannot be stopped.

The support we have had from our community over the past month has been both shapeshifting and cloudbusting...

The Leeds Wood Recycling community, like your community, is made from the dog walkers, parents, neighbours, friends of friends, people at the bus stop you give a nod to each day, or the person you phone to order your warehouse provisions from and have a long natter to each week.

This weekend it landed, how, commonly we compartmentalise the people we meet on our days off, as different from being in your community, but community is 24/7.

We all mean something to each other, however big or small.

It's comforting.

**LEEDS  
WOOD  
RECYCLING**

We're feeling grateful.

But the purpose of this note is more, it's to remind us all that we are connected.

**People do care.**

And no matter how bleak the world or politics can look, we are lucky, because we have that connection and community, and so do you.

Carry on the kindness folks. It is stronger than the dark x
